CAREER SUMMARY

Computer Science student at North Dakota State University with practical experience in software development and system design. Skilled in creating efficient, scalable, and user-focused software solutions that address real-world challenges. Combines strong analytical thinking, teamwork, and creativity to deliver impactful results. Seeking a Software Engineering Internship to contribute to innovative projects while further developing technical and professional expertise.

EDUCATION

NORTH DAKOTA STATE UNIVERSITY

Fargo, ND

Bachelor of Science: Computer Science

Anticipated Graduation 2028

WORK EXPERIENCE

UNITED LIBERIAN INLAND CHURCH AND FRIENDS

Minneapolis, MN

Web Developer

June 2022 - Present

- Initially rebuilt the website from scratch with a better frontend using JavaScript, HTML, Vanilla CSS, and Bootstrap.
- Recently built an admin panel which made features such as uploading newspapers, seeing change logs, and viewing donations accessible. Using PHP, MySQL, HTML, & Vanilla CSS.
- Used Figma to design and outline the website frontend design, which allowed for admins to see a visual mockup.

TARGET

Minneapolis, MN

General Merchandise

November 2023 – August 2024

- Updating item information such as dates and prices by paying key attention to detail, which led to organized data and customer satisfaction.
- Assisted customers by finding and helping with their needs, resulting in a happy shopping experience for the customers.
- Exhibited strong work ethic by organizing the items on the shelf by Universal Product Code (UPC), which led to an easier shopping experience.
